

LIVE OAK WASTEWATER TREATMENT PLANT

CITY OF LIVE OAK | LIVE OAK, FLORIDA

PROJECT HIGHLIGHTS

- Construction management-at-risk and design-build engagement for an upgrade to an existing wastewater treatment facility to public access reuse standards
- Phase 1 of the project upgraded the 1.25 MGD facility and Phase 2 expanded capacity by 1.25 MGD, for a total capacity of 2.5 MGD
- Project components included site development, pretreatment structure with mechanical bar screen, secondary treatment process tankage, clarifiers, filters, chemical feed, emergency generator, electrical, instrumentation, high service pump station, solids dewatering and aerobic digester
- A 3,200 SF Administration Building valued at \$400,000 was constructed utilizing funds generated through project savings. Total project savings of \$650,339 were returned to the client.
- Coordinated requirements of multiple funding agencies

HASKELL SERVICES PROVIDED

- Design Management
- Preconstruction Services: Estimating, Scheduling, Value Engineering and Constructability Reviews
- Permitting
- Construction
- Start-Up, Testing and Commissioning
